

# Portland Cycle Tracks

Presenter: Adam Herstein

# Portland Today

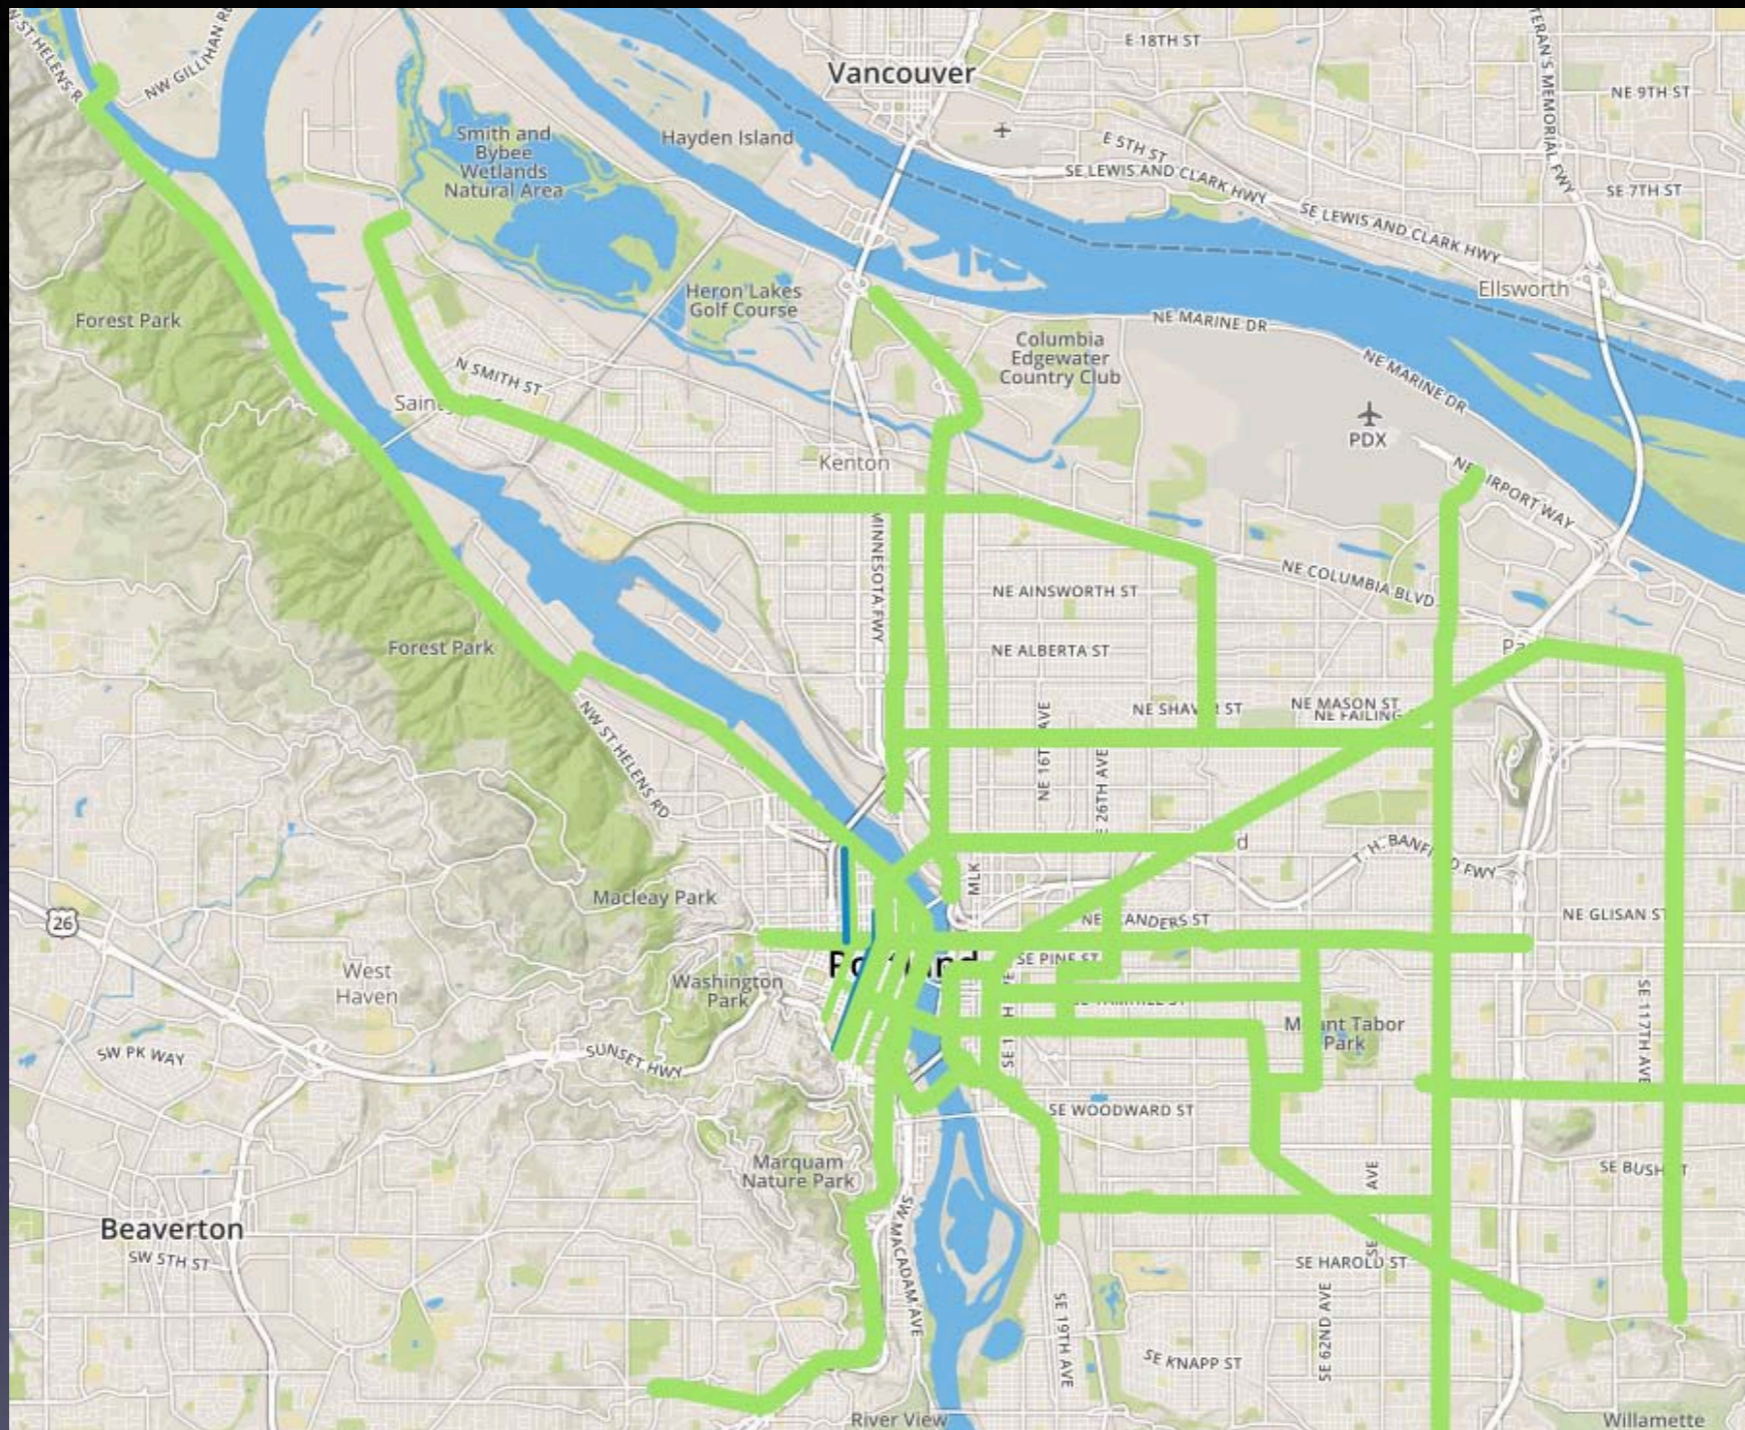

- Well-connected network of Neighborhood Greenways are great for commuting.
- No access to business districts.
- "Last mile" problem.

# The Solution

- A connected network of cycle tracks along commercial corridors.
- Protected intersections at key locations with high traffic volume.
- Car-free streets in pedestrian-heavy areas.
- True 8-80 transportation system.

# Potential Problems

- Cycle tracks are costlier than painted lanes or Neighborhood Greenways.
- Requires street reconfiguration and potential reduction in car capacity.
- Pushback from businesses concerned about loss of car parking.

# Proposed Map
